Operations	Sales operations, CRM and lead management, lead routing and deduplication, funnel and conversion analysis, occupancy reporting, process improvement, workflow documentation, SOP development, reporting automation
Real Estate	AppFolio, property management systems, lease administration, contract management, tenant relations, listing and MLS syndication, multi-property portfolio management
Leadership	Team leadership, performance management, coaching and training, stakeholder communication, cross-department coordination, client relationship management

PROFESSIONAL EXPERIENCE

01/2025 – Present

Sales Admin Specialist (Sales Operations and Internal Tools)

Zuma Housing · Los Angeles, CA (Remote)

- Support leasing and sales operations for a 300-bed student and young-professional housing portfolio serving the UCLA market.
- Serve as sole internal developer while carrying a full leasing and sales workload, designing and shipping every operational system the sales team uses.
- Built an internal property management platform on Supabase (PostgreSQL, Auth, Realtime) with a Next.js and React front end, modeling applications, units, leases, tenants, leads, and showings for 5 to 10 daily users.
- Developed an automated reporting pipeline that pulls AppFolio exports from email into Google Sheets and Supabase, replacing a recurring manual reporting cycle.
- Processed lease agreements and contracts to an audit-ready standard of accuracy and compliance, and owned tenant and lease records supporting reporting and reconciliation.

01/2020 – 01/2025

Unit Manager and Licensed Financial Consultant

Pru Life UK · Philippines

- Recruited, led, and developed a unit of 30 or more financial consultants, running performance evaluations and coaching underperformers back to standard.
- Advised clients on long-term financial goals through strategic asset allocation and risk management.
- Built durable client relationships that sustained retention and repeat business across a five-year tenure.

05/2018 – 06/2020

Mathematics Teacher

Southville International School and Colleges · Philippines

- Built an automated mailing system that streamlined recurring updates to teachers and stakeholders.
- Trained students for local and international mathematics Olympiads, producing multiple award recipients.

12/2012 – 12/2014

Data Analyst

Accenture Inc. · Philippines

- Produced management reporting on transaction trends and irregularities, and resolved complex transaction exceptions under high-volume conditions.

KEY PROJECTS

Platform

Internal Property Management Platform

Supabase, PostgreSQL, Next.js, React, Netlify

- Architected and built the company platform solo, centralizing business logic in SQL views so leasing, accounting, and marketing read from one source of truth.
- Designed a lease-type taxonomy that let leadership separate genuinely new business from renewals and transfers for the first time.

Reporting

Automated Sales Reporting System

Google Apps Script, Google Sheets API

- Built a 5,800-line system that auto-imports AppFolio reports from email into Sheets, generates per-property dashboards, and rolls highlights into one executive view.

Dashboard

Unit Availability Dashboard

283 units, multi-property portfolio

- Collapsed three separate date fields into one derived availability answer, eliminating spreadsheet cross-referencing for agents during showings.

Sales intake

Lead Deduplication and Routing Engine

Google Forms, Apps Script

- Built phone-normalized deduplication with email fallback, sticky agent ownership, and round-robin distribution that advances only on genuinely new leads.

AI

Transcript to Verified Action Items

Python, Claude API · github.com/bryanknows/transcript-actions

- Built a tool that turns meeting transcripts into action items linked to the exact lines they came from, using a strict JSON tool schema and a code-level quote check that rejects invented items; covered by 134 automated tests.

EDUCATION

Bachelor of Science in Applied Mathematics (Actuarial Mathematics)

Polytechnic University of the Philippines, 2012

CERTIFICATIONS

Licensed Financial Consultant
Certified Investment Advisor
