Real Estate AppFolio, property management systems, lease administration, contract management, tenant relations, listing and MLS syndication, multi-property portfolio management

Leadership Team leadership, performance management, coaching and training, stakeholder communication, cross-department coordination, client relationship management

PROFESSIONAL EXPERIENCE

Sales Admin Specialist (Sales Operations and Internal Tools)
01/2025 - Present

Zuma Housing | Los Angeles, CA (Remote)

- Support leasing and sales operations for a 300-bed student and young-professional housing portfolio serving the UCLA market.
- Serve as sole internal developer while carrying a full leasing and sales workload, designing and shipping every operational system the sales team uses.
- Built an internal property management platform on Supabase (PostgreSQL, Auth, Realtime) with a Next.js and React front end, modeling applications, units, leases, tenants, leads, and showings for 5 to 10 daily users.
- Developed an automated reporting pipeline that pulls AppFolio exports from email into Google Sheets and Supabase, replacing a recurring manual reporting cycle.
- Processed lease agreements and contracts to an audit-ready standard of accuracy and compliance, and owned tenant and lease records supporting reporting and reconciliation.

Unit Manager and Licensed Financial Consultant
01/2020 - 01/2025

Pru Life UK | Philippines

- Recruited, led, and developed a unit of 30 or more financial consultants, running performance evaluations and coaching underperformers back to standard.
- Advised clients on long-term financial goals through strategic asset allocation and risk management.
- Built durable client relationships that sustained retention and repeat business across a five-year tenure.

Mathematics Teacher
05/2018 - 06/2020

Southville International School and Colleges | Philippines

- Built an automated mailing system that streamlined recurring updates to teachers and stakeholders.
- Trained students for local and international mathematics Olympiads, producing multiple award recipients.

Data Analyst
12/2012 - 12/2014

Accenture Inc. | Philippines

- Produced management reporting on transaction trends and irregularities, and resolved complex transaction exceptions under high-volume conditions.

KEY PROJECTS

Internal Property Management Platform | Supabase, PostgreSQL, Next.js, React, Vercel

- Architected and built the company platform solo, centralizing business logic in SQL views so leasing, accounting, and marketing read from one source of truth.
- Designed a lease-type taxonomy that let leadership separate genuinely new business from renewals and transfers for the first time.

Automated Sales Reporting System | Google Apps Script, Google Sheets API

- Built a 5,800-line system that auto-imports AppFolio reports from email into Sheets, generates per-property dashboards, and rolls highlights into one executive view.

Unit Availability Dashboard | 283 units, multi-property portfolio

- Collapsed three separate date fields into one derived availability answer, eliminating spreadsheet cross-referencing for agents during showings.

Lead Deduplication and Routing Engine | Google Forms, Apps Script

- Built phone-normalized deduplication with email fallback, sticky agent ownership, and round-robin distribution that advances only on genuinely new leads.

EDUCATION

Bachelor of Science in Applied Mathematics (Actuarial Mathematics) 2012

Polytechnic University of the Philippines

CERTIFICATIONS

Licensed Financial Consultant | Certified Investment Advisor
